ESD assistant

Prerequisites:

No specialized prerequisites required.

Training content on the first day:

- Fundamentals of electrical engineering and electrostatics, dangers of ESD, consequences of ESD, miniaturization
- Potential generation by contact, tribo-electrical range, influence effect, discharge risks (models), how do we recognise ESDS (data sheet, code letter ...)
- Where do ESD hazards occur? From incoming to outgoing goods. Where are certain protective measures required?
- ESD protective areas: Definition and boundary conditions with relevant reference standard
- Protective measures within the EPA with relevant reference standard: Personal measures such as wrist straps, garment, shoes, tables, shelves, chairs, carts, floor coverings, packaging materials in accordance with EN 61340-5-3

Training content on the second day:

- A full day of measurement training in accordance with: EN 61340-5-1 and 2-3 with approx. 90 measurement exercises: Rpp, Rgp, Rg, Rs, potential reduction, potential measurements by means of rotary voltmeter, electrostatic voltmeter and contact voltmeter, walking tests in accordance with EN 61340-4-5

Training duration:

2 days (1 day theory, 1 day of hands-on measurements)
9:00 AM to 5:00 PM on both days

Documents:

You will receive a comprehensive course portfolio printed in colour.

Supporting documents:

- Certification following a written final examination. This will be sent to you corrected.
- Certificate of completion in printed form.

The company / The trainer

Particular emphasis is placed on practical relevance in our ESD training sessions. This practical relevance is primarily down to many years of audit experience. Well over 500 ESD consulting and certification audits carried out at home and abroad are witness to this. It is also indispensable to have had the responsibility of an ESD coordinator to convey this knowledge professionally.

Arguments that speak for themselves:

- More than 20 years of professional experience in quality assurance.
- Former ESD coordinator of Robert BOSCH GmbH in Reutlingen.
- Certified auditor.
- Diplom. Engineer (Automation Technology / Power Electronics).
- Many years of experience in ESD auditing for companies covering different industries.
- Former employee at BOSCH ESD Standards Committee AK019
- Participation in German ESD Standards Committee.
- Independent business, therefore no conflict between training and sales of ESD items.
- Comprehensive measurement exercises with a maximum of five person per measurement group, equipped with a complete set of high-quality measuring instruments.
- Of course, like your graduation or profession, your certificate is not limited in time too.
